

Wireless Internet Access at the Eagle Bay Community Hall

The recent introduction this summer of fibre optic high speed Internet services to the Eagle Bay area has meant that it would now be possible to offer Wireless Internet access at the Community Hall. This service could allow web browsing, information downloads, Zoom meetings, email access etc. to any member or group/class activity at the hall.

The Eagle Bay Community Association (EBCA) is asking for feedback from the community whether having Internet access at the Eagle Bay Hall would be something the community would welcome?

Based on your feedback and the level of interest the EBCA will determine whether Internet access is provided, so please respond via email to info@eaglebayhall.ca

Thank you for your anticipated response from the EBCA Board.
